

4.2 Newsletter Spring Term 1

Firstly, thank you for all working with us so well this year so far! We are proud of every single pupil for adapting to the new 'normal' whether they are working from home or at school.

In preparation for our exam, we will be focussing on Measurement for Maths this half term both online and in class.

We are looking at Acids and Alkaline substances as we begin the Chemistry element of our Science course, with some interesting experiments planned and our exam at the end of term.

Our English work will be based around Non-fiction text, researching and some creative writing, to start extending our English portfolio as part of the exam process and preparation.

With some students in class and some at home I aim to provide everyone with the same background knowledge in preparation for when we can all be together again.

However, if you do have any troubles or question please contact me via email: DPearce@rigbyhall.worcs.sch.uk or via teams/ chat.

Hope everyone stays safe and well during this time,

Mr Pearce
