

4.2 Spring Term Newsletter

Hello and a Happy New Year!

We are starting 2022 with lots of new topics and areas of learning. This is the term when we have to show our fantastic progress this year so far and we can celebrate our achievements.

Maths will focus on Geometry and Statistics and in our English lessons we begin the interview and presentation skills for speaking and listening.

This term we can also complete the ICT units for our exam and finish the modules for Science.

So all in all a busy term!

Mr O'Brien has mentioned Friday as PE kit day and how pleased he was to see us in our Rigby School uniforms which makes us all look so professional as we either get ready to move to college or the 6th Form.

We will finish our class update with our calculations from our time and calendar maths module- 32 school days until half-term which gives us 192 hours to enjoy our learning and develop new ideas and skills. 😊
